with space connected
technology

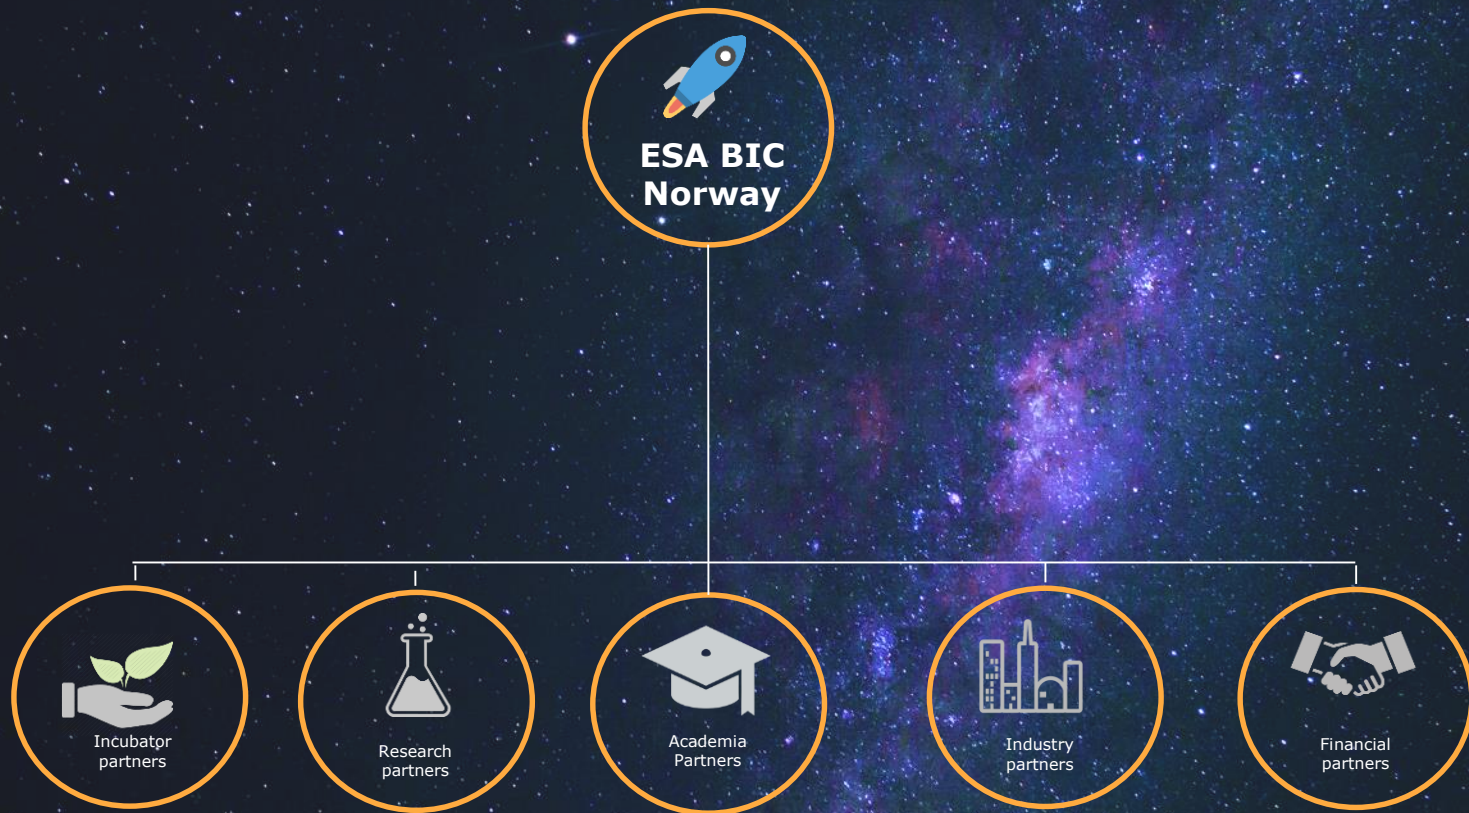

50.000€
In funding from ESA
and Innovation Norway

Business incubation
Business advice and support.
International network and events

Technical support
Access to ESA IP and technical
support from R&D partners

A vibrant, multi-colored view of the Milky Way galaxy against a dark starry background. The galaxy's core is visible as a bright, multi-colored band of light, transitioning from purple and blue to red and orange. The surrounding space is filled with numerous stars of various colors, including blue, white, and yellow. The overall scene is a rich, multi-colored representation of our home galaxy.
